

## Bob Litsey

I came to Boulder Language Technologies with 20 years of teaching experience at Eisenhower Elementary in Boulder Valley School District. During the last 13 years I taught fourth grade. We had a very strong hands-on science program, and I really enjoyed working with the students. During this time, I helped develop several classes in regard to outdoor education. During the summers, a fellow teacher and I taught model rocketry and robotic classes to elementary and middle school students.

I have a BA from Western State in Gunnison and a masters degree from CU Boulder. In my spare time I enjoy gardening, working in the community through my church and having fun with my wife Judy and our four children.
